DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. The drawings are objected to because blank boxes contained in the drawings. Please insert short descriptive labels within the blank boxes. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement-drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the examiner does not accept the changes, the applicant will be notified and informed of

any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

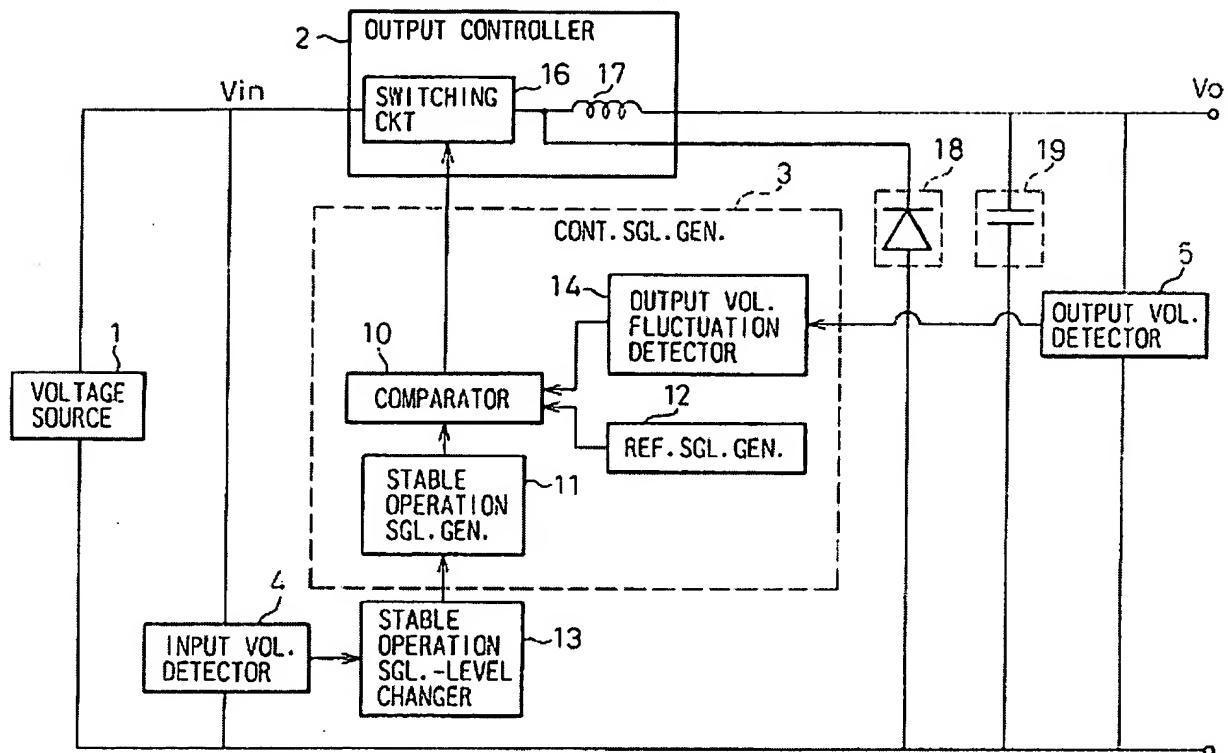

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 17, 18, 20-30, 32-34 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Saeki et al. (USP 5,572,112). Saeki discloses the claimed invention a switch device (16), a filtering circuit (19), a feedback device (5), a controllable amplifier (10), and a compensation signal-generating device (11). See figure below

Fig. 5

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 19 and 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Saeki et al. (USP 5,572,112) in view of Schemmel et al. (USP 5,572,112).

Saeki discloses the claimed invention except for the use of a complex resistor for adjusting the gain of the amplifier circuit. Schemmel discloses that it is known in the art

to provide the use of a complex resistor for adjusting the gain of the amplifier circuit. It would have been obvious to one having ordinary skill in the art at the time of the invention was made to provide the use of a complex resistor for adjusting the gain of the amplifier circuit of Schemmel with the open loop switching power supply circuit of Saeki, in order to provide a more precise way of controlling the gain on the amplifier by adjusting the complex resistor.
